Subject: Omega Soil Sampling

Hi Chuck - to confirm our discussions today regarding soil sampling:

-soil samples for laboratory analysis collected on 10/27 and 10/28 from 3 Geoprobe borings on the Star City portion of the Omega site were collected using the Encore system, in accordance with the procedures described in the On-Site Soils Work Plan

-soil samples for laboratory analysis will not be collected from the 4 sonic boring locations on Putnam Street

The MIP boring on the C&I Electric portion of the Omega site and the 4 borings (2 MIP and 2 Geoprobe) on the adjacent Terra Pave property will be advanced and sampled once access is obtained. At all 5 locations, the Encore system will be utilized to collect soil samples for laboratory analysis.

Any questions, please call or e-mail.

Regards, Sharon
